

INTERNSHIP COMPLETION REPORT

Operations Industrial Engineer Job Simulation — Siemens

INTERN CANDIDATE Rishabh Mishra	HOST ORGANIZATION Siemens
ISSUING PLATFORM Forage	COMPLETION DATE September 20th, 2026

Executive Summary

This report documents the practical completion of the **Operations Industrial Engineer Job Simulation** provided by **Siemens** in collaboration with **Forage** [cite: 1]. Over the program period in September 2026, key practical engineering tasks were executed to optimize production workflows, reduce process inefficiencies, and improve overall operational layouts [cite: 1].

Key Responsibilities & Module Accomplishments

During the simulation, hands-on tasks in industrial engineering were completed with focus on the following key operational domains [cite: 1]:

- **Time Studies & Work Measurement:** Conducted detailed analysis of operational workflows, measuring task durations, evaluating cycle times, and identifying bottlenecks across assembly and production processes to establish standard work times [cite: 1].
- **Facility Layout & Process Optimization:** Analyzed existing floor layouts and proposed strategic layout modifications aimed at reducing material handling costs, minimizing worker transit time, and improving overall line ergonomics [cite: 1].
- **Data-Driven Decision Making:** Synthesized operational timing data to formulate actionable recommendations for continuous improvement (Kaizen) in Siemens operations environment [cite: 1].

Core Competencies Demonstrated

- ✓ Industrial Process Optimization & Workflow Design
- ✓ Standard Time Measurement & Line Balancing

Certificate & Credential Verification

The practical tasks were verified and officially issued by Forage upon successful completion [cite: 1]. Below are the authentication details associated with the credential [cite: 1]:

Verification Field	Identifier Code
Enrolment Verification Code	6aaf8ccd8b93e7892aecbfe4
User Verification Code	6aaf8c43d1b8813a4b4121df
Program Executive Signature	Tom Brunskill (Co-Founder of Forage)
